Summary

Results-driven AI/ML Engineer with hands-on experience in building predictive models, implementing text classification, and designing GenAI solutions using Google Cloud Vertex AI. Skilled in the full ML lifecycle, from data preprocessing and feature engineering to model deployment and optimization. Proven ability to translate complex datasets into scalable automated solutions.

Education

Integral University July 2020 – July 2024
Bachelor of Technology in Computer Science Lucknow, UP

Experience / Internship

Nexus Info July 2024 - Sep 2024
Data Science Analyst Intern

- Improved model efficiency and data handling processes using Python and SQL.
- Delivered high-quality data-driven insights to stakeholders to enhance business decision-making.
- Collaborated in a project environment to streamline data workflows and reporting.

CodTech It Solutions June 2024 - July 2024
Machine Learning Intern Lucknow, UP

- Engineered and deployed machine learning models for text classification and anomaly detection using Python and Scikit-learn.
- Optimized model performance through iterative testing and hyperparameter tuning.

Projects

Google Ads Campaign Analysis | *Python, SQL, Google Sheets, Tableau* Apr 2025

- Analyzed ad performance data (CTR, CPC, CPA, ROI) to identify underperforming campaigns and optimize budget allocation.
- Automated KPI tracking which reduced manual reporting overhead by 60%.

E-commerce ETL & Analytics Pipeline | *Python, PostgreSQL, Kaggle API* Nov 2024

- Architected an ETL pipeline to automate data extraction and transformation, creating optimized fact and dimension tables.
- Integrated various data sources to build a centralized repository for scalable analytics.

Telecom Churn Prediction Model | *Python, scikit-learn, Streamlit* Nov 2024

- Developed a predictive model using multi-dimensional data to reduce churn risk by 20-25%.
- Applied Agile methodology to iterate and improve data handling processes.
- Presented analytical insights to stakeholders, demonstrating business impact and change readiness.

Technical Skills

Machine Learning: Supervised/Unsupervised Learning, Text Classification, Anomaly Detection, Disease Prediction.
AI & GenAI: Prompt Design, Vertex AI, Large Language Model (LLM) workflows.
Programming & Frameworks: Python (Scikit-learn, Pandas, NumPy, Streamlit), SQL.
Data Engineering: ETL Pipeline Development, Data Transformation, PostgreSQL, MySQL.
Analytics & Visualization: Statistical Analysis, A/B Testing, Tableau, Power BI.

Certifications

- * Google Cloud Prompt Design in Vertex Ai - May 2025
- * Build Real World AI Applications with Gemini and Imagen - Google Cloud - May 2025
- * IBM Excel Basics for Data Analysis - IBM - Feb 2025
- * IBM Introduction to Data Analysis - IBM - Feb 2025
- * Google Advanced Data Analyst Professional Certificate - Sep 2024
