PROFESSIONAL SUMMARY

Data-focused professional with expertise in Power BI and Tableau, skilled in transforming complex datasets into actionable business insights. Proficient in SQL, Excel, statistical analysis and ETL pipeline optimization.

EDUCATION

B.Tech. Computer Science, Integral University

2020 - 2024

Relevant Coursework: Machine Learning, Artificial Intelligence, DBMS, and Data Structures.

SKILLS

Data Visualization	Power BI (DAX, Power Query), Tableau, Excel(Pivot table , VBA)
Databases	SQL , PostgreSQL , Snowflake
Programming	Python, R(Basics)
Data Engineering	ETL Processes, Data Cleaning (Python Pandas), API Integration.
Statistical Knowledge	A/B Testing, Cohort Analysis, Time-Series Analysis, KPI Design.

EXPERIENCE

Data Analyst Intern

Aug - Oct 2024

Nexus Info

Tamil Nadu, India

- Automated Power BI dashboards for multi-department KPI tracking, reducing reporting time by 45%.
- Optimised Python scripts and SQL pipelines for faster data processing, improving model efficiency by 30%.

Machine Learning Intern

June - July 2024

CodTech IT Solutions

Bangalore

- Prepared large financial datasets for predictive modeling, improving overall data quality and model readiness
- Supported ML development using Python and scikit-learn, enhancing anomaly detection accuracy.

PROJECTS

Customer Churn Predictive Analytics — Tableau, Python, PostgreSQL Built a churn prediction model with 87% accuracy by analyzing customer behavior using Python and PostgreSQL. Created interactive Tableau dashboards that helped identify high-risk customers and reduced potential churn by 18%.

E-Commerce Sales Intelligence Dashboard — Power BI, SQL Designed a Power BI dashboard using SQL-driven data models to track revenue, profit margins, and top products across 5+ regions. Improved sales reporting speed by 40% and supported management decisions through real-time KPIs.

Financial Performance Tracker — Power BI, REST APIs, DAX Integrated live financial data from REST APIs into Power BI and built DAX measures to monitor cash flow, expenses, and ROI. Automated monthly reporting and improved forecasting accuracy by 20%.

CERTIFICATION

- Databases & SQL for Data Science with Python - IBM (March 2025)
- Excel Basics for Data Analysis - IBM (Feb 2025)
- Google Advanced Data Analytics Professional Certificate - Google (Sep 2024)
